One Gleam of Romance of any use. It will soon be quite dark, and there is no moon to-night?"

So I walked on, a solitary damsel, along that interminable country road. I walked in good spirits, and am always delighted when I first see a new prospect untolding before me. But I had somewhat miscalculated my strength. It is one thing to walk out in the fresh and pleasant in his voice. There was morning and another thing to make a sufficient light to discover a bright-eyed for feeling tired almost on the outset of my walk. I felt that I should be very glad if I could make friends with any ood-natured driver who could give me a lift. Sometimes when we came back on a market day father did not at all mind our carrier, who was also parish clerk, giving us a lift in his covered But this seemed to be a lonely road through an uninhabited country.

There drove up a perfectly white man in a cart full of meal-bags; but there was hardly room for himself among his bags, and I besides did not want to be perfectly white.

By the irony of fate there also came by a coal wagon, but I had as little wish to be black as to be white. Then I came to a little roadside inn which had a board with a painted remark about being "drunk on the premises." I rather quickened my pace, for such an an-nouncement suggested that there might be roughs ahead.

Then I listened, but listened in vain. should have been glad of the company of any good old market woman with whom I could have chatted as I walked along, and in fact I would not at all have minded carrying her eggs for her for company's sake.

Presently I heard the sound of wheels, the sound of rapid driving. A turn of the road discovered to me a young man driving a tandem. The horses were spirited and fresh, and he had some difficulty in pulling them up when he came close

"Well, my pretty maid," he cried, "are you all by yourself? Shall I give you a lift? Take a drive with me in my

trap. It will be a lark for you."

Now I really was very tired. But it
was very impertment for him to call me a pretty maid, which, indeed, I was not. Then I knew that my father quite disapproved of young men driving tandem. Then it was quite disrespectful, to say the least of it, to make that remark about "a lark." Besides, the young man's eye and voice and manner were not at all to his credit. They suggested the idea that he had been at the iun which I had left behind me, and had car-ried out the idea of getting "drunk on the premises."

So I made up my mind in a moment "No, thank you, sir; I had rather walk."

"Where are you going?" It was no business of his, but I answered quietly, "I am going to Manning-

"So am I. And it is more than seven miles. You will never be able to do it. Get up, my dear; I'll lend you a hand." This was very insolent—I mean call-mg me "my dear." I gave no answer, but walked forward briskly. He was up in a moment and jumped out of his gig, keeping the reins in his hand.

"At any rate you will give me a kiss?" I shrieked and ran away from him as fast as I could in the opposite direction, going over the ground which I had toilsomely traveled a little while before, My knees bent under me, and I thought I should have fainted. A glance showed me, however, that he did not dare leave the two horses, which were champing and fretting to be off. How, in my heart of hearts, I blessed those honest horses Then the wretch actually shook his fist

at me, uttering ugly words.

Presently, and with a feeling of great
joy and relief on my part, he was out of
sight as fast as his two horses could carry him. In the meanwhile, I had sun down exhausted by the wayside. The road had a wide margin of grass which rose at this point into a hillock shadowed by a copse of trees. There was literally a mossy couch where I reclined, and also literally watered it with my tears. In all my life I had never been so grossly de-

an injustice. The shadows were falling faster and tonger as I, once more summoning all my energies, resumed the walk. It was quite clear to me that I should not get to Donnington till midnight; and what in the world would they think of me? And I am not partial to walking in the dark in a perfectly strange country, but though I lost my spirits, my courage kept up wonderfully. I kept on bravely for three-quarters of an hour, but instead of persevering in the walk I had to mit down and rest myself, which all good mallers know to be a very bad sign.

walkers know to be a very bad sign.

Presently I once more heard the sound of wheels, and looking back I saw that there was a young gentleman in a dog-cart. He stopped his horse at the bot-tom of the hill, and I perceived that he was lighting his side-lamps. That alone would be enough to remind me that the evening was fading into night. He came slowly up the bill, but easily overtook me, and might have passed me unregard-ingly, only, happily, his eye fell upon me as I was nervously trying to crouch out

"Ah," he said, "my poor girl, you seem tired. Have you far to go?"

I thought it best to put a good front en matters. My pride revolted at being called a poor girl, although such, a word exactly described me as I then was

"I have missed a carriage that was to have met me," I said, "and am walking

"This is the road to Manningham, where I am driving. You are going there, too, I presume. I think you had better allow me to drive you into the town.

There was something very courteous in so firm a tone as I ought:

"No, thank you. I shall manage to walk on."

He moved his hat, and with a sinking heart I saw him proceed on his way. It came into my mind that I would call after him and accept his proposition. Pride, however, came to my help, and I refrained from doing so. Fortunately, however, he stopped his horse and waited till I should come up.
"I hope, ma'am," he said, "that you

I stammered out some kind of a refusal.

once."

He was positively ordering me to get in, and I had not sufficient strength of mind or body to resist his orders. If he had tried to beg and entreat and coax me to get in, I know I should have walked on till I dropped; but, being peremptorially told to get in, my girlish instinct of obedience came to my help, and I was lifted in by a strong arm be-fore I quite knew what was being done with me.

I was so thankful when I was being years, at \$20 a year, are more industrious. comfortably driven along, the swift mo-tion and brisk air bringing back my high spirits, as they always do. I told my deliverer what was my destination. He knew Donnington and he also knew that time of night I could get a vehicle to take me on. Perhaps it might not be right to travel up to the Wilmslows at the late hour when I should arrive. Unfortunately, he himself had to go five miles in another direction. He was already past his home and the late hour when I should arrive. Unfortunately, he himself had to go five miles in another direction. Perhaps, too, we both doubted how far it would be in exactly good taste for a young gentleman to drive up a young lady at midnight to a sedate household where she was to be

an exemplary governess.

But we had a very pleasant talk. He told me all about the gentleman to whose house I was going, a country squire and at the same time a practical farmer, cultivating a thousand acres of his own. He thought I should like the place and the people, and he certainly amused me very much by the way in which he described all my future surroundings. But all the time it was easy for me to see Fiji has 100 inches of rain in the averthat his mind was not quite at rest, that he was not quite certain what was best to be done, and rather anxious as to the upshot of the adventure.

Traits of Overworked Men.

[Macmillan's Magazine,]

Nothing could have been kinder, for example, than the act of Sir Walter Scott, writing out sermons for a young aspirant to the Scottish ministry, whose state of nerves made him unable to grapple with the task and satisfy his Presbytery. Similar, though in a quite differ-ent sphere, was the kinduess shown by Vinet, at Lausanne, to a peasant woman who invaded his solitude one Sunday morning. Overcome by toil and illness. Vinet had been obliged to forbid the visits of strangers, and his family were guarding him with all possible care.

graded and insulted.

Was this, indeed, the beginning of my entrance upon the world? Surely the world was something infinitely more vile and evil than my father's sermons had ever told me it was. I felt like some roor damsel in the days of Arthurian he would be able to give her the needed guidance. With much difficulty, he mut admission to his room. We can fancy the anxious relatives enjoining her to detain him as short a time as possible. But Vinet, when he heard her story, was profoundly interested, and spent the whole day with her, up to the hour of the last stage coach. The account which the woman gave to her own pastor, on re-

"Well" said the pastor, "have you been able to see him?" "Yea," she replied, "and at last I have found one who has humbled me." "Humbled you! M. Vinet is not the man to humble any one." "Yes, humbled me, and humbled me profoundly. In contact with his humility and goodness I felt all my pride give way." Then she told how thoroughly he comprehended her case, how patiently he spent the whole day with her, and all in such a homely way that she felt as if he was her brother. A few days after Vinet sent her a book newly published, as if she had been one of his chosen friends.

A Successful Tramp Law.

The Hartford, Conn., Courant sent out circulars to the selectmen of every town in the State asking questions about the operation of the tramp law passed by the last Legislature. One question was, "Has the law resulted in practically freeing your town from tramps?" The uniform answer is that it has. "Has it been used answer is that it has. to oppress deserving men?" was another question. To this there is a negative reply in all cases. It is reported that it is sustained by public opinion almost to a man. There are 120,000 natives, including 20,000 available for work, but when employed as laborers, they idle away their time unless closely watched. Their wages are \$20 a year, besides food, clothing, and tobacco, costing \$20 more, making the total expense less than \$4 a month. Natives of New Britain and New Ireland, hired by terms of three

With such wages there is no chance for a white man to make anything as a laborer, and there is little opportunity to make much as an employer, unless he has \$10,000 capital to begin with. The test month, has a mean temperature of 84 deg., with a maximum of 99 deg. in the shade, and 160 deg. in the sun; and July has a mean of 77 deg., with a mini-mum of 67 deg. three feet from the ground, 55 deg. in the grass, and a maximum of 85 deg. in the shade and 140 deg. in the sun.

There is never a month when the heat does not go to 140 deg. in the sun. The coldest month of Fiji is about 20 deg. hotter than the warmest in San Francisco, if the adjective cold can be applied to any month in the former place or warm to any in the latter. Though age year, it has only 150 rainy days, and the climate is generally considered a very pleasant one for those accustomed to the torrid zone. There are no malignant fevers or malarial diseases, and beautiful. Taken altogether, Fiji will always be considered a tropical paradise.

> No Skylarks [Duke of Argyll.]

One hears the migratory thrush (robin) verywhere, in the midst of the gardens and villas of towns and cities, and in every little clearing of forest on the out kirts of human habitation. It is a pleasant song, but decidedly inferior to any one of its cousins in Britain. It is inferior in power to the missal thrush, in variety to our common "mavis," in melody to the blackbird. Near Niagara I heard one very broken and interrupted soug and of fine tone, and of considerable power. But although I was in the woods and fields of Canada and of the States in the richest moment of the spring, I heard little of that burst of a g which in England comes from the blackcap and the garden warbler, and the white-throat, and the reed warbler, and the common wren, and (locally) from the nightingale.

Above all, there is one great want which nothing can replace. The meadows of North America were to my eye thoroughly English in appearance, the same rich and luxurisnt grass, the same character of wild flowers, and even the same weeds. The skies of America are higher and wider and more full of sunshine. But there is no skylark to enjoy that "glorious privacy of light." "The sweetest singer in the Heavenly Father's choir" is wanting in the New World. I can not help thinking that it might be introduced. Of course, the winters of Canada and of the Northern States would compel it to follow almost all the other birds which summer there, and to retire with them until the return of spring to Virginia or the Carolinas. It would be an interesting experiment. I do not know whether it has been tried. If not I would suggest it to my American friends as one worth trying. It would be a happier introduction than that of the London sparrow.

A Zulu youth can not marry a girl until he has whipped all her brothers and given her father a fall if demanded, in addition. This makes a courtship more exciting than chocolate caramels and gumdrops; but the Zulu maiden who has four brothers weighing 180 pounds each, and measuring fifty inches around the waist, generally dies an old maid, while the girl whose brothers are weak and sickly, and whose father is under the daisies, is overrun with proposals. It is a queer custom, and if it was in vogue this country a girl who is an only child and a half orphan on her father's side would be at a premium.
